

A quick update as we are about a month away from the signup deadline. I currently have about 21 golfers registered not including myself.

Some of you may have noticed at the bottom of the portal events is a Fall Trip Master List dated the day after the fall trip ends to keep it at the bottom. I'm trying something a little different this year for tracking registrations versus spreadsheets. As I receive registrations, I am adding golfers to this event. I have configured some of the extra fields to track details about the registration. This also allows you to go in and see if I have your registration and I have you entered your information correctly (versus you finding out and letting me know afterwards). I have been known to make a mistake from time to time so I always welcome a second set of eyes.

If you go to the event and use the Pairings button, you should see the screen shot below. The Group column is who I have you listed with as a partner for the 4-day. Pay status is whether I have your check in hand or already received Venmo/Zelle payment. The Pay Method is at least how I think you will pay if you haven't already. WU Day 1-3 is whether you signed up for warm up days or not. The Tee is what I have you listed at as a default with Men's being white, Men Senior being Yellow, Men super senior being Red and women being Red (still working on women super senior so be patient.

On tees, you will have the ability to adjust your playing tees as you start scoring as in years past. We do ask that you stick with the same tees for all 4 rounds of the 4-day.

Email me back with any other questions or requests as well as if you see an error in what I have down for you thus far.

Thanks, and hope to see everyone in Gulf Shores/Orange Beach this fall.

Lance
